Hi, I'm Mike, a **frontend developer with over 13 years of experience building remarkable experiences for the web**. I specialize in frontend development with the latest technologies in **JavaScript, Typescript, Vue, React, HTML, and CSS**.

SKILLS

JavaScript

Typescript

Vue

React

Next.js

Vitest

HTML

CSS

Tailwind CSS

UI & UX

Leadership

Mentorship

EXPERIENCE

Square(Block), Toronto — *Software Developer(Frontend)*

June 2018 - February 2025

Website Editor Team - January 2022 - February 2025
Technology & skills: Typescript, Vue, Pinia, Vuex, Laravel(PHP), React, Vitest, HTML, CSS, UI/UX, Leadership, Mentorship

- Worked with product management and design to build feature-rich tools and experiences for our sellers to build their brand and online store.
  Highlights:
  - Website editor font customization tools for sellers.
  - A set of tools and components that provided sellers with greater control of their brand through feature rich customization tools for unique sections of their website.
  - Theme settings control center for site fonts, buttons, images, and sections.
  - Integration with Unsplash and iStock to provide sellers with a built in tool for searching and downloading high quality photos for their sites.
  - Square Online onboarding theme and preview tools.
- Led an initiative to update our internal component library from Vue 2 to Vue 3.
- Implement large-scale refactors and optimizations of our frontend datastores and components.
  - Moved significant portions or the Website frontend data stores from Vuex to Pinia. This sped up development, allowed for greater developer experience and simplified our later move to Vue 3.
  - Led an initiative to refactor many of our Vue 2 components to Vue2/3 composition API. This allowed for better Typescript support, less boilerplate, and better overall developer experience.

Shipping and Store Set Up Team - January 2021 - December 2021
Technology & skills: Ember, HTML, CSS, UI/UX, Leadership, Mentorship

- Oversaw the integration of UPS and Square Online APIs and built a robust dashboard using Ember.js to effectively manage shipping orders and their corresponding labels and packing slips.
- Led the initiative to bring shipping labels and packing slip

Education

Mohawk College
Hamilton, Ontario

Graphic Design
Diploma

management to Japan through an integration with Ship and Co.

ECOM Integrations Team - June 2018 - December 2020
Technology & skills: Vue, Vuex, Laravel(PHP), Go, Backbone, HTML, CSS, UI/UX, Leadership, Mentorship

- Worked with backend developers on various initiatives to integrate Weebly(Square Online) and Square Dashboard item inventory management.

Weebly, Toronto — *Software Developer(Frontend)*

November 2017 - June 2018

Integrations Team - November 2017 - June - 2018
Technology & skills: Vue, Vuex, Laravel(PHP), Go, Backbone, HTML, CSS, UI/UX,
